

ZEN AIRLINES

INFLIGHT SAFETY PROCEDURES

Seat Belts

Inhale deeply, exhale slowly – time to engage in the seat belt ritual. Insert the metal tip into the buckle, then pull the strap to tighten. Keep your belt fastened whenever you're seated, even when the sign off.

Life Vests

In a water landing, your life vest is located under or beside your seat. When instructed, slip it on and tighten the straps. Do not inflate until exiting the aircraft. Inflate by pulling the toggle, and achieve flotation nirvana.

Oxygen Masks

If cabin pressure changes, oxygen masks will magically appear. Remain calm and place the mask over your nose and mouth. Secure your own mask before assisting others

Emergency Exits

Even a zen master likes to know the way out. Your nearest exit may be behind you – take a look to be sure. In an evacuation, please leave your belongings behind

Thank you for flying Zen Airlines. We wish you a safe, calm,
